Saturday Morning, Aug. 4, 1880.

REPUBLICAN NOMINATION.

FOR PRESIDENT,
Abraham Lincoln,
OF ILLINOIS.

FOR VICE-PRESIDENT,
Hannibal Hamlin,
OF MAINE.

Scientific Convention.

THIRD DAY.
FRIDAY MORNING, AUG. 3.

In General Session.
Minutes of last meeting read and approved.

Standing Committee reported that the Permanent Secretary, in conjunction with the Local Secretary, have power to arrange with railroads for passage of members.

The following persons were elected members: Lieut. C. B. Comstock, U. S. A., Dr. F. V. Marshall, Fall River, Mass., Norman Eastman, Fall River, Mass., D. Conway, Cincinnati, J. C. Ainsworth, Barre, Mass. The following Associate Members: Geo. T. Hammond, Newport, E. A. Silsbee, Salem, Scott Russell, Jr., England.

Col. Foster moved, and it was voted, that Prof. Agassiz be requested to read his paper in General Session.

The Sections separated, as Prof. Agassiz was not in the house, and in

SECTION A.
The records of last meeting were read, and Prof. Chauvenet, of Annapolis, Md., was elected Chairman of the day.

"Some experiments and inferences in regard to the Binocular Vision" was read by Prof. W. B. Rogers. This was a beautiful paper, and at the close of Prof. Rogers' reading, he was greeted with a round of applause.

Lieut. Hunt, Prof. Henry, and Prof. Leconte spoke briefly, each giving incidents in confirmation and illustration of Prof. Rogers' views.

"On the date and methods of the Hindu Astronomy," by Prof. W. D. Whitney, the Professor stated that the Hindus considered the earth as the centre, and all other bodies were supposed to revolve around. No accurate geologic knowledge was found in their works, and no special study of the stars, as classifying them in clusters, is traced in their writings. They divided the Zodiac into 28 lunar mansions, and although much research has been employed, it is not settled where this division originated. They believe in an independent revolution of the Dipper in 5400 years, the same name as ours, and they had seven planets.

Prof. Conkley, of Hagerstown, Md., and Rev. Henry M. Hartman, discussed briefly the subject elucidated by Prof. Whitney.

Dr. Gould, at the close of the discussion, moved that Section B be invited into this room, in order that the whole Association, with the ladies, might be better accommodated in hearing Prof. Agassiz's paper. The invitation was not accepted.

Prof. Henry was upon the programme for a paper on Atmospheric Electricity; but from some misunderstanding having been put down also for a lecture the previous evening, in which the same paper was read, he only re-stated at this time his theme—"A New Source of Atmospheric Electricity—Induction."

"Notes on the Sources of Error in the employment of Phlogiston to detect the presence of Potash."

"On a series of new combinations of Ammonium, Phlogiston, and Metallic Base." Both of these papers, by M. C. Lea, were read by Prof. Silliman, Jr.

"On the Combustion of Wet Fuel," by B. Silliman, Jr., the Professor announced his object to be, to state how this kind of fuel can be economically used. And, in brief, it is by constructing a stack in such a manner as to resist heat, and exclude the atmosphere and thus the fuel, being a compound, gives up its constituent and latent heat, and these again, by forming new compounds, generate an intense heat; afterwards being brought into contact with the atmosphere under the boiler or elsewhere, they are consumed.

Dr. Gibbs, Prof. Howard, Mr. Locke, briefly discussed the subject brought before the Association by Prof. Silliman.

"Theory connected with the Solar Spots" read by Prof. Hackley. The theory is that matter passes from the sun to the earth with great velocity, affecting the temperature, and furnishing materials for aurora borealis, and causing malades. In proof of this, the Professor read a large number of striking incidents.

Prof. Norton followed in remarks partially favoring the theory of the preceding reader, and also raising a difficulty in its way.

C. C. Coffin of Boston, called attention to the importance of registering the connection between the weather and the state of the public health.

Mr. Judd of New York, enquired how long after the spots are noticed before the effects are observed upon the earth. Prof. Hackley replied three or four days.

A member inquired if the fact that chemists had never detected in the air this arid matter from the sun which is alleged to produce diphtheria and similar diseases was not an objection to the theory advanced? It was replied that if they had made an attempt to do so and had failed, it would so be.

Adjourned.

4 1-2 P. M.
Dr. Steiner, of Baltimore and Prof. Schofield, of St. Louis, were elected to fill vacancies in the Standing Committee.

Capt. E. B. Hunt, U. S. A., read a description of a new Portable Coffin Dam, the idea of which occurred to him, and will be put into practice while superintending certain constructions at Fort Taylor, Key West. The novel feature is this:—A strong canvas case for the whole coffin, using two thicknesses of canvas and interposing a complete coating of mineral tar, to act as an adhesive and impervious agent. Along the line corresponding to the bottom of the coffin, must be joined a flap, to spread over the bottom as far as may be necessary, according to the nature of the bed of the stream. This bed should be raked clear of sticks and stones. Then the usual process with coffin dams may be followed. The facility with which the coffin may be taken up and re-established, constitutes its great recommendation.

Solar Eclipse July 18, 1860, discovered by Dr. Smallwood of St. Martin, C. E., presented by Dr. Gould. This paper contained a minute description of all the phenomena which such an observer, under the most favorable circumstances, would be likely to observe, covering all the ground desirable, and made with all the precision worthy of the track of total obscurity. Prof. Oakley also gave a history of his observations of the same eclipses.

Adjourned.

SECTION B.

MORNING SESSION.
Prof. Whitney concluded his paper on the lead mines of the Upper Mississippi. The Professor considered the position in which the lead deposits are found, and discussed the question how these metals came in the fissures where they are. He inclined to the opinion that they existed in general diffusion in the ocean at the time of the deposit of the water, and that they were precipitated by some causes connected with the formation of rocks.

Prof. Agassiz gave a very entertaining account of his new system of arrangement for the new Museum of Comparative Zoology at Cambridge. He described first the manner in which the Museum was founded, by the liberality of Boston gentlemen and the Massachusetts Legislature. In the arrangement of the Museum he has avoided the old building system, and substituted one that shall lead the student step by step. The first entrance of the student is to a room where animals are divided into 4 classes; and from this place the student passes to the mind the distinctions between these classes.

In other parts of the building are the general specimens, arranged both in geographical and chronological order. He thinks this system most rational as well as useful. One tenth of the building intended is only now erected; but specimens are coming in faster than he can accommodate them. No architect has been allowed to spoil the edifice, he having it constructed with especial reference to its use. They have many duplicate specimens, which, by the system of exchange, can be made to enrich other Museums and themselves at the same time. Another idea is, to furnish an asylum for private collections—many collections being made by private individuals afterwards are scattered and lost from the want of some such institution. This Museum already ranks as the ninth in the world, and it is hoped and expected that it will soon be on a par with the best.

4 P. M.
"On the Origin and Distribution of the Sediments composing the Stratified Rocks of North America," by J. S. Newberry.

"On the Surface Geology of Western America," by J. S. Newberry. "Some Points in the Surface Geology of the Northwest," by J. D. Whitney. "Remarks on the Distribution of Gold in Veins, with Notes upon Remarkable Gold Specimens from Georgia," by William P. Blake.

"On the Ethnological Value of the imitative faculty in relation to the characteristics of ancient and modern American Races," by Daniel Wilson. "On the Paleolithic Wells of the Mississippi Valley," by J. Newberry. "Description of a new species of Trilobites from the Pottersdam sandstone, by E. H. Bradley, with Notes by E. Billings.

We have only space to say, that these papers called forth remarks by Prof. Agassiz, which were warmly applauded, and also remarks from others.

"On Certain Phenomena of the Great Dismal Swamp in Virginia and North Carolina," by Nathan B. Webster. This paper contained much information upon this "dismal" locality, rendered famous by song. A specimen of wood found 17 feet below the surface of the ground was exhibited. Prof. Rogers was elected Chairman for to-day, (Friday), after which this Section adjourned.

PROGRAMME FOR TO-DAY, (SATURDAY.)

GENERAL SESSION, 10 O'CLOCK, A. M.

Papers to be read.

- 1.—Modern Warfare; its science and art. By E. B. Hunt. (10 m.)
- 2.—Abstract of the principal results of the observations of the Tides at Van Buren Harbor, made by the second Grinnell Expedition under command of Dr. E. K. Kane, U. S. Navy, during 1853, '54, '55, from a reduction and discussion by Charles A. Schott, Assistant Coast Survey. Presented by A. D. Bachs. (15 m.)
- 3.—On Oculoholism, a new optical property belonging to certain Crystalline Surfaces, with some remarks on Polarization, by reflection from colored surfaces. By M. C. Lea. Presented by B. Silliman, Jr. (15 m.)
- 4.—On a new theory of Light, proposed by J. Smith, of Manchester, England. By O. N. Road. (15 m.)
- 5.—Some reflections on the Observations of the Solar Spots and of the Magnetic Variations. By James Hyatt. (10 m.)
- 6.—On the Aethiopia of the electric discharge in vacuum tubes. By W. B. Rogers. (10 m.)
- 7.—Investigation of the problem regarding the existence of a lunar tidal wave on the great fresh water lakes of North America. By J. D. Graham. (15 m.)
- 8.—On the Hydrates of Sesquioxide of Chromium. By E. N. Horsford. (15 m.)

LOCAL ITEMS.

DEATH BY LOCKJAW.—The death of Geo. B. Langley, 24, which will be found recorded under the Obituary head, was caused by lockjaw. About three weeks ago he injured one of his feet quite seriously by getting it caught in a griddlestone. It healed rapidly, however, was not painful, and excited little or no apprehension, until some ten days after the accident, when the symptoms of lockjaw began to develop themselves, and continued to increase in severity until yesterday, when death came to the relief of the sufferer.

This is the third case of lockjaw which has occurred in this city since last May, one of which was permanently cured after the jaws were nearly closed.

INITIAL PAPER.—Mr. A. J. Ward has favored us with a specimen of beautiful initial paper, stamped upon a machine which he has recently purchased and set up in his store. We understand that this is the only machine of the kind in Newport, and that heretofore our stationers were obliged to send orders for this paper to the larger cities.

[For the Daily News.]

Election Bribery.

At a meeting of the Rhode Island Baptist Ministerial Conference, at the Brown Street Baptist Church, Providence, April 23, 1860, the subject of "Election Bribery" was referred to a Committee, of which the Rev. Christopher Rhodes, of Warwick, was made chairman, who at the quarterly meeting, Central Baptist Church, Newport, July 23d, submitted the following report, viz:

"The best interests of our government being the object of the people, the safety of the government necessarily depends upon the purity of the elections. Whatever, therefore, corrupts the principles of the electors, or gives to candidates for office an influence beyond their personal merit, must endanger the government. These are the legitimate results of bribes. For,

First. They centralize power in a way foreign to our form of government.

Second. They place wealth above fitness or merit in the selection of candidates.

Third. They aid the ambitious and aspiring to obtain their own nomination and election.

Fourth. They violate the law, which the Statute Law shows, the penalty of which is, as may be seen in Sec. 3, pages 88 and 89, of Revised Statutes, 1857, a fine of five hundred dollars, or an imprisonment, together with a perpetual disfranchisement.

Fifth. They minister to avarice.

Sixth. They make the love of gain usurp the place of principles.

Seventh. They debase the morals both of those who give and of those who receive the bribes.

Eighth. They violate the trust committed to freemen. The ballot is not a matter of property, but an individual solemn trust—ac inheritance given alike to the poor and the rich; and no freeman, without injury to the rights of another freeman, and to a country of freemen, can sell his vote. By so doing he violates his sacred obligation.

Whatever, therefore, may be the personal or party gain, political bribery being so injurious to the public morals and so destructive to the political institutions of the nation, the MEMBERS of this Conference earnestly and kindly urge men of all political parties, by their regard for the Statute Law which those bribes violate, and by their love for the government they endanger, to discountenance and suppress all such practices, and to employ every consistent influence to preserve the sacredness and integrity of the ballot box.

And, in the opinion of this Conference, freemen are morally bound to attend the primary as well as the general meetings, and deposit their ballots in accordance with their judgment. A juror is no more bound to discharge his duty intelligently and independently to his country and his God, than a freeman is to fulfill his trust to himself and the community, and in no other manner can our present government be preserved.

The foregoing paper, after due examination at an adjourned meeting, held in the First Baptist Church, Providence, July 30th, was unanimously adopted, and the secretary was requested to furnish a copy, and to express the desire of the Conference that it may be published by the press without distinction of political parties.

A true copy—Attest:

JOHN OAK RICHARDSON, Chairman

FOSTER HENRY, Secretary.

Pawtucket, B. I., July 30th, 1860.

"I blush for you," as the *rouge* put said to the old maid.

It is much to be feared that "the glass of fashion" is the wine-glass.

Those always absent in company should be always absent from it.

As a general rule, a fashionable beau, like a bow in the sky, can't make both ends meet.

Died.

In this City, Hattie F. infant daughter of Nathan M. Chaffee, aged 5 months.

Relatives and friends respectfully invited to attend the funeral on Sunday afternoon at 4 o'clock from his residence No. 61 Prospect Hill Street.

In this City, 3d inst., George B., second son of William C., and Margaret J. Langley, aged 11 years and 3 months.

Special Notices.

CLYDE GYVEN, Poets, Authors, Members of the Bar, and all Newport in fact, are having their likenesses taken by T. L. L. L., who holds forth at 3 DeBols Block. The rush for pictures is unprecedented; crowds of men, women and children daily visiting his rooms. Go to TYLER for your likeness. jyl3

Humphreys' Homeopathic Specifics. CURE PROMPTLY and safely all the more common diseases and ailments to which families are subject. In all acute diseases, such as fevers, influenza, malarial, Diarrhea, Dysentery, Croup, Rheumatism, and such eruptive diseases as Scour, Fever, Measles, and Erysipelas, the advantage of giving the proper remedies promptly is obvious, and in all such cases the specific acts like a charm. The entire disease is often arrested at once, and in all cases the violence of the attack is moderated, the duration shortened, and rendered less dangerous. Coughs and Colds which are of such frequent occurrence, and which so often lay the foundation of diseased lungs, bronchitis and consumption, may all be at once cured by the Fever and Cough Pills.

In all chronic diseases, such as Dyspepsia, Weak Stomach, Constipation, Liver Complaints, Piles, Female Debility, and Irregularities, Old Headaches, Sore or Weak Eyes, Catarrh, Salt Rheum, and other old eruptions, the case has specific whose proper application will afford a cure in almost every instance. Often the cure of a single chronic difficulty, such as Dyspepsia, Piles or Catarrh, Headache or Female Weakness, has more than paid for the case ten times over.

For price, see advertisement in another column. Address, DR. HUMPHREYS & CO., No. 562 Broadway, New York. CASWELL, MACK & CO., Sole Agents in this city.

NOE'S ITALIAN Magnet Air Electric, HAIR LIFE.

LADIES and Gentlemen, if you desire to have your hair a beautiful Black or Brown, of natural color, you can attain this result by using this Chemical Medical Preparation. It is got up with great skill and care, and has no similarity to any other article now before the public. You are not troubled with washing the head or whiskers. The application is accomplished in a moment's time, and warranted not to injure the hair or skin. It is warranted to dye Gray or Red Hair to prevent the hair falling off, to cure Baldness and Scurf; to soften and gloss the Hair and Whiskers; to never fade to dye after the third application. In every case where it fails the money will be refunded without equivocation.

A few Medical and Vegetable Ingredients Compound the Hair Restorative Hair Life. The inventor has had years' experience in it. The Hair Restorative Hair Life is the best and cheapest article of the kind in the market, and the only one without blemish. It was applied during the past five months, partly for ladies, and in all for about 3000 persons, and has never failed in a single case.

TESTIMONY

Thos. Rich, Notary Public, Nos. 113, 114 and 118 South Water st.; Philip Carr, Captain of the steamer Sylph; C. G. Dodge, No. 102 Westminister st.; Perry W. Greene, No. 3 Maple st.; J. C. Parlin, No. 20 Sheldon st.; Benj. F. Gilmore, No. 229 Westminister st.; Providence, R. I., J. L. Anthony, Westport, Mass.; M. Monti and J. Ragusa, No. 77 Tremont st.; Hartford, Conn.; John Lee, No. 10 Vandewater st.; New York; Peter Nelson, No. 33 State st.; Charleston, S. C.; Louis L. Murphy, C. Union, Mass.

If you wish more testimony, inquire of the public. The Hair Restorative Hair Life is for sale by H. H. Burroughs, 101 North Main st.; J. Balch & Son, 42 South Main st.; Providence, R. I.; J. Taylor 1011 Thaumet st.; New York; and by Druggists everywhere, at Wholesale or Retail. Retail price 75c per bottle. Each bottle is sealed with full directions for use, and for mark, the Proprietor's Photograph.

A liberal discount made to the trade. Apply and for sale, Wholesale and Retail, at the Proprietor's store, L. J. NOE, No. 9 Orange st., opposite Middle st., Providence, R. I.

Directions for Use—Pour a small quantity of the liquid into a saucer, and with a stiff brush saturate the hair well with the Hair Restorative, dividing it with a comb, so that it may get well down to the roots; after this has been thoroughly done, take a cloth wet with any kind of clean water, and wipe the skin all around the edges of the hair, and expose the head and Whiskers to the air as much as possible. You can repeat the application after twenty-four hours, and the third application is seldom required. You may use Oil or Pomade on your Hair or Whiskers, if you wish, as they will not injure the Hair Life.

Hotels.

UNION HALL.

SARATOGA SPRINGS, NEW YORK.

This well known Hotel, pleasantly located on the west side of Congress Springs, and opposite the celebrated CONGRESS SPRINGS.

OPENS FOR VISITORS.

June 15th for the Season.

By the addition, just finished, of a handsome brick building, two hundred and forty-one feet long, by twenty feet wide, and five stories high. It is much the largest Hotel in the place, having a front of over ONE THOUSAND FEET, and CAN ACCOMMODATE OVER ONE THOUSAND GUESTS.

THE DINING HALL, KITCHEN, AND LAUNDRY are unsurpassed in this country, in extent and completeness, and probably in the world.

The Court, enclosed by the main building and family cottages, forms a lawn of several acres in extent, intersected with shaded walks. A fine band of music belonging to the house will be in attendance during the season.

Carriage-houses are also attached to the premises, affording every facility for excursions for the accommodation of guests.

The management of Union Hall, we trust, will meet with the approval of all who may honor us with their patronage.

FUTNAM & PAYNE, Proprietors.

July 6-1m

ST. NICHOLAS HOTEL.

Broadway, New York.

WHEN COMPLETED, six years ago, the St. Nicholas was universally pronounced the most magnificent, convenient, and thoroughly organized establishment of the kind on this continent. What it was then it remains to-day—without a rival in size, in appointments, and in the general elements of comfort and enjoyment.

The Hotel has accommodations for 1,000 guests, including 100 complete suites of apartments for families. Six hundred persons can be comfortably seated at the tables of its three public dining rooms, and nothing that modern art has devised for the convenience and social gratification of the traveling public has been omitted in its plan, or neglected in its practical details. The early reputation of the house at home and abroad, derived from its magnificence, its superb appointments, and its home-like comforts and luxuries, has been maintained every year by the unwearied exertions of its proprietors.

TRADEWELL, WHITEHEAD & CO., may 18-6m

Ice Cream Establishment.

THE SUBSCRIBER begs leave to inform his former customers and the public in general, that he has removed his place of business to his New and Elegant Establishment, Third Door North of the Old 8 and, where he is now prepared to furnish Families and Parties of all kinds, who may give him a call, with the choicest of Confectionery, together with Ice Cream, Water Ice, Pastry, Cake, Fruit and Preserves. Having had an extensive experience of several years, he flatters himself of being able to suit all who may favor him with a call. He is also prepared to furnish to any extent, Parties, Balls, Weddings, &c., with his highly celebrated Ice Creams, Water Ices, and all that pertains to a complete outfit in his peculiar branches. As he has spared neither time nor money in getting up his new and elegant Saloon, and in making his establishment what he believes to be the first in New York, nothing on his part will be wanting to supply his Patrons and the Public with the best the markets produce; also being and Ornaments of Calico executed in a workmanlike manner. All orders in the above line thankfully received and promptly attended to.
